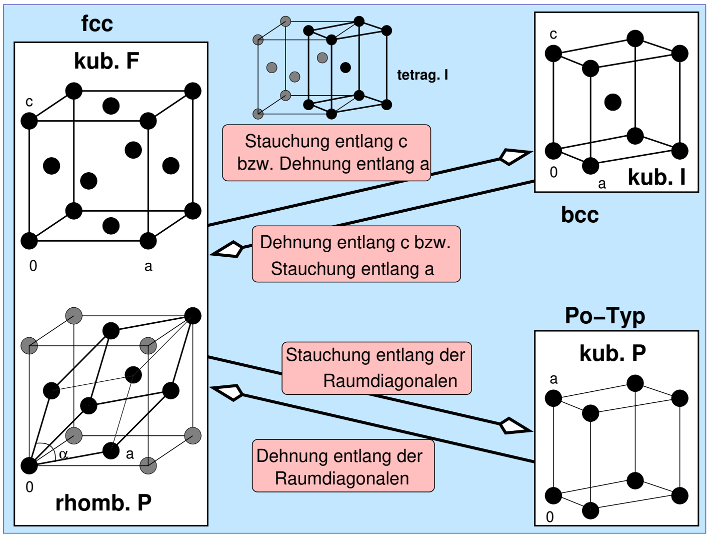
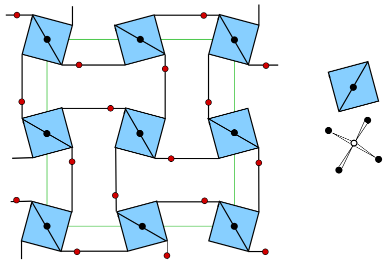
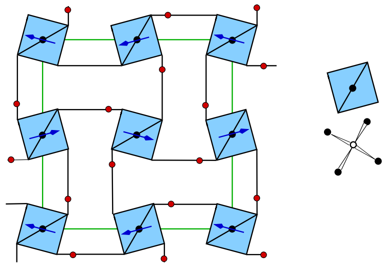
2.1. Phasenumwandlungen: Beispiele (Forts.)



Verzerrungen von Metallpackungen

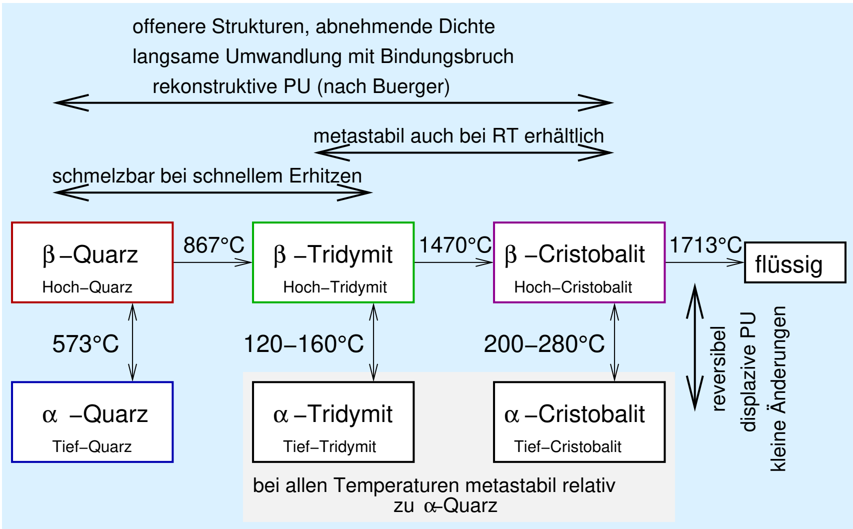


ferroelektrisches KH_2PO_4

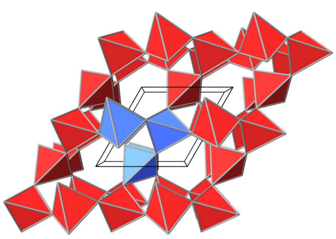


antiferroelektrisches $NH_4H_2PO_4$

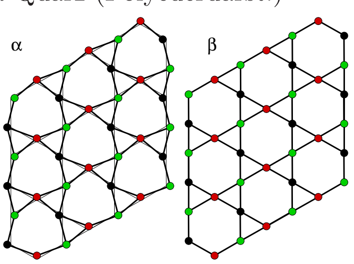
Beispiel $\mathbf{SiO_2}$



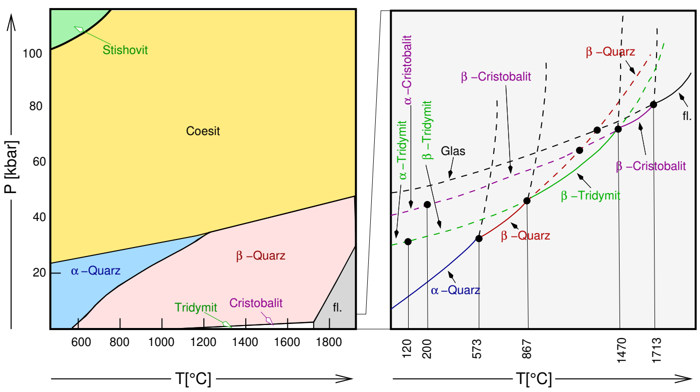
thermodynamisch stabile Normaldruckphasen



α-Quarz (Polyederdarst.)



α- (RG $P3_121$) und β- (RG $P6_222$) Quarz (nur Si-Positionen)



Phasenbeziehungen zwischen den verschiedenen SiO_2-Modifikationen
